## **DETAILED ACTION**

### ***Amendment***

1. Receipt is acknowledged of the amendments filed 24 September 2003 and 26 September 2003.

### ***Allowable Subject Matter***

2. Claims 32, 33, 35, and 95-113 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of record fails to teach the specific system, device, and computer program for multiple purpose smart cards that utilizes a card reader with a pressure sensitive membrane and positional keypad overlay for activating a set of computer interpretable functions that correspond to a layout of indicia on the overlay, an electronic memory which stores additional data associated with the textual information presented, and that the smart card is adapted for both non-computer based and computer-based information transfer. Although the best prior art of record teaches different parts of the instant application (i.e. Taylor teaches multi-use cards, Yokokawa teaches a card with displayable information, and Combaluzier teaches a control unit that receives a smart card, but fails to teach the electronic information to store additional data), the combination of the references does not render the complete arrangement of the components of the invention as claimed in the instant application.

Hence the best prior art of record fails to teach the invention as set forth in claims 32, 33, 35, and 95-113 and the examiner can find no teaching of the specific system and device for multiple purpose smart cards, nor reasons within the cited prior art or on

her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/responses filed 24 September 2003 and 26 September 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 5,901,067 to Kao et al. which discloses a system for interactively selecting and activating groups of electrically powered devices.
